

ENDPOINT BACKUP SOLUTION

Protect your endpoints from data loss with Direct-to-Cloud backup without the need for appliances.

Endpoint Backup, Simplified!

Back up your system directly to the Cloud every 2 hours, with no appliances required. Stay informed with notifications for any backup failures, ensuring you never miss a backup!

Simple

Using image based technology, it simplifies how users can restore files and folders easily in case of ransomware attacks, accidental file deletions or lost or stolen devices.

Reliable

Backup automatically pauses if the connection is interrupted and automatically resumes once the connection is restored. Integrity checks (Screenshot Verification) validate every backup and provide notifications if there are any issues.

Cost Savings

No hardware or software purchase required—just pay for the storage you need and enjoy free access to the software.
